1. How the System Works

The TOCCA Admin Portal manages the entire awards process — from receiving business registrations, reviewing and approving them, sending out notifications, all the way to public voting and results.

As an administrator, you have access to all modules: Registration review, Communications, Reports, Award management, and Audit Logs. This manual walks you through every task you'll perform.

2. The Awards Process Flow

Phase 1: Registration

Businesses register online through the public registration form. They fill in their business details, select their award categories, and upload their Mayor's Permit.

■ Your role: Review each registration.

Phase 2: TWG Validation

Approved businesses are evaluated and scored by the Technical Working Group. The top 5 per category advance to public voting.

■ Your role: Send TWG notification emails.

Phase 3: Public Voting

Top 5 businesses receive QR codes and voting links. The public votes online. TWG score (40%) + public votes (60%) = final winners.

■ Your role: Confirm for public voting, send QR emails.

3. Registration Status Guide

Status	What It Means	What You Can Do
Pending	Just submitted. Waiting for admin review.	Review it, then Approve, Reject, or mark Needs Info.
In Review	An admin is currently looking at it.	Same actions as Pending.
Needs Info	Missing documents or details. An email was sent asking for more info.	Once they respond, review again.

Status	What It Means	What You Can Do
Approved	Passed verification. Business record created for TWG scoring.	Status is locked. Proceed to TWG validation.
Rejected	Did not pass verification.	Can be reversed — you can still Approve it if needed.

■ **Important:** Rejected registrations can be un-rejected. If you accidentally reject someone, just open their profile and click "Proceed to evaluation" to approve them. Only Approved and Merged statuses are permanently locked.

4. Reviewing Registrations

When a business registers, their application appears in the Registration module. Here's how to review one:

1 Open the Registration List

From the sidebar, go to **Registration**. You'll see a table of all registrations with their status. Use the filters at the top to narrow down by Status, Category, or specific Award.

2 Click on a Business Name

Click any row to open that business's full profile. You'll see all their submitted details: business name, owner, contact info, address, uploaded documents, and which award categories they selected.

3 Review Their Details

Check the following:

- Is the business name correct and legitimate?
- Did they upload a valid Mayor's Permit?
- Are the selected award categories appropriate for their business type?
- Is the email address valid?

4 Take Action

On the right side of the profile, you'll see the **Review Actions** panel with three buttons.

Button	When to Use
Proceed to evaluation	Everything looks good. This approves the registration and creates the business record for TWG scoring.
Mark as Needs Information	Something is missing or unclear. An email will be sent asking for more details.
Reject	The registration does not qualify. An email notification is sent.

■ **Important:** "Proceed to evaluation" does NOT send an email automatically. It only creates the business record for TWG scoring. To notify businesses that they passed verification, use the **TWG Email Blast** page (see Section 6).

5. Status Actions Explained

Proceed to Evaluation (→ Approved)

When you click this:

- The registration status changes to **Approved**
- A business record is created in the system for TWG scoring
- No email is sent (you send that separately)

■ Once approved, the status cannot be changed back.

Mark as Needs Information

Use this when the registration is incomplete. A compose window opens where you can write a message explaining what's missing. The system sends an email to the business. The business can then update their registration and you can review it again.

Reject

Use this for registrations that don't qualify. A compose window opens for you to explain the reason. An email is sent to the business.

■ If you accidentally reject a business, don't worry. Open their profile — the action buttons will still be active. You can click "Proceed to evaluation" to approve them.

Removing Individual Awards

Sometimes a business qualifies overall but one of their selected award categories doesn't fit. You can remove individual awards without rejecting the entire registration. The available reasons are:

Reason	When to Use
Wrong category or nature of business	The award doesn't match what the business actually does
Does not meet award criteria	The business doesn't meet the specific requirements

Reason	When to Use
Does not offer the product / service	The business doesn't actually sell or provide the product/service
Requested by business	The business owner asked to be removed from that category
Other	Any other reason (you'll need to specify)

6. Sending Emails

The system can send several types of emails:

TWG Notification Email Blast

This sends the official **"Your registration has been verified"** email to all approved businesses, informing them about the upcoming TWG Validation phase. It includes the TOCCA-2026.pdf attachment.

How to use:

- 1 Open the TWG Email Blast page**
 Go to `tocca_admin/twg_email_blast.php` in your browser. The page automatically loads all approved registrations.
- 2 Review the recipient list**
 You'll see a table with every approved business, their email address, and contact person. Each row has a checkbox. Uncheck any business you don't want to email. Invalid emails are automatically disabled.
- 3 Preview the email**
 Scroll down to see exactly what the email will look like. It uses the official TOCCA branded template.
- 4 Click "Send TWG Notification Emails"**
 A confirmation dialog appears. Click OK to start sending. The system sends in batches of 5. You'll see a progress bar and each row updates to show "sent" (green) or "failed" (red) in real time.

QR Code and Voting Link Email

This is sent later, only to businesses that make it into the **Top 5** after TWG scoring. It contains their unique QR code poster and voting link. Triggered from the business profile by clicking **"Confirm for public voting"**.

Status Update Emails

When you mark a registration as **"Needs Information"** or **"Reject"**, the system automatically opens an email composer. You write the message and it's sent using the branded TOCCA template.

7. Downloading Reports

You can download the registration list as **Excel**, **PDF**, or **CSV**.

1

Set your filters first

On the Registration page, use the dropdown filters to select Status, Category, and Award.

2

Click the "Download" button

A dialog appears with the options shown in the table below.

Option	What It Does
Scope	"All Categories" exports everything. "Selected Category & Award" exports a specific category.
Status	Filter the export by status (Approved, Pending, etc.). Syncs from your page filter automatically.
File Format	CSV (spreadsheets), Excel (formatted with colors), or PDF (print-ready).

3

The report includes these columns:

Column	Description
#	Row number
Business	The registered business name
Award(s)	Which award categories the business registered for
Email	Business contact email
Status	Current registration status

■ If you filter by a specific category or award, the Award(s) column will only show awards within that filter.

8. Managing Awards

Awards are organized by **Category** (like Food, Service, Feelings) and each category has specific award titles (like Best Halo-Halo, Best Café).

During registration, businesses first select their **"Nature of Business"** (e.g. Restaurant, Cafe, Bakery). The system shows only the awards that apply to their business type. They can select multiple awards across different categories.

As an admin, you can remove specific awards from a business without rejecting their entire registration. This is useful when a business registered for an award that doesn't match what they actually offer.

9. Audit Logs

The **Admin History Log** tracks every action taken in the system for accountability and troubleshooting.

What Gets Logged

Action	Description
Status change	When a registration is approved, rejected, or marked needs info
Email sent	Every email sent through the system
TWG email blast	Bulk notification emails with success/failure counts
Award removal	When an admin removes a specific award
Report export	When a registration list is downloaded

Filters Available

Filter	Use
From / To	Date range
Module	Area (Registration, Communications, Events)
Action	Specific action type
Search	Free-text search

■ **Note:** All timestamps are in Philippine time (Asia/Manila, UTC+8) regardless of server location.
